Synopsis

Introduction

Our initiative “ Blood Emergency Service ” has its main objective revolving around. How to minimize the deaths due to lack of blood.

Facts verified by google states that

- Due to lack of blood, there are approx. 12,000 deaths per day.
- Which amounts to 43,80,000 per year.

The percentage goes to 0.31% out of 138 crore population.

India suffers from deficiency of 4 million units of blood. Due to improper channel of distribution & lack of awareness is widening the gap.

Our this initiative locates the place where the person is highly in need of blood through their intimation & identify the volunteer who can be potential donor through their registration with our organization.

Working of Project

We would prefer to elucidate our project with the help of a factious scene.

There was a fellow named Amit passing through a crossroad & saw a bloody accident thereby. The victim's injury and huge blood loss. The victim was taken to hospital by Amit & came across the fact that the victim was a daily wage worker and did not possessed only wealth which was enough to get the treatment and not enough money to get the blood for transmission.

Now what should Amit do ?

Our Website is made to tackle this type of situations.

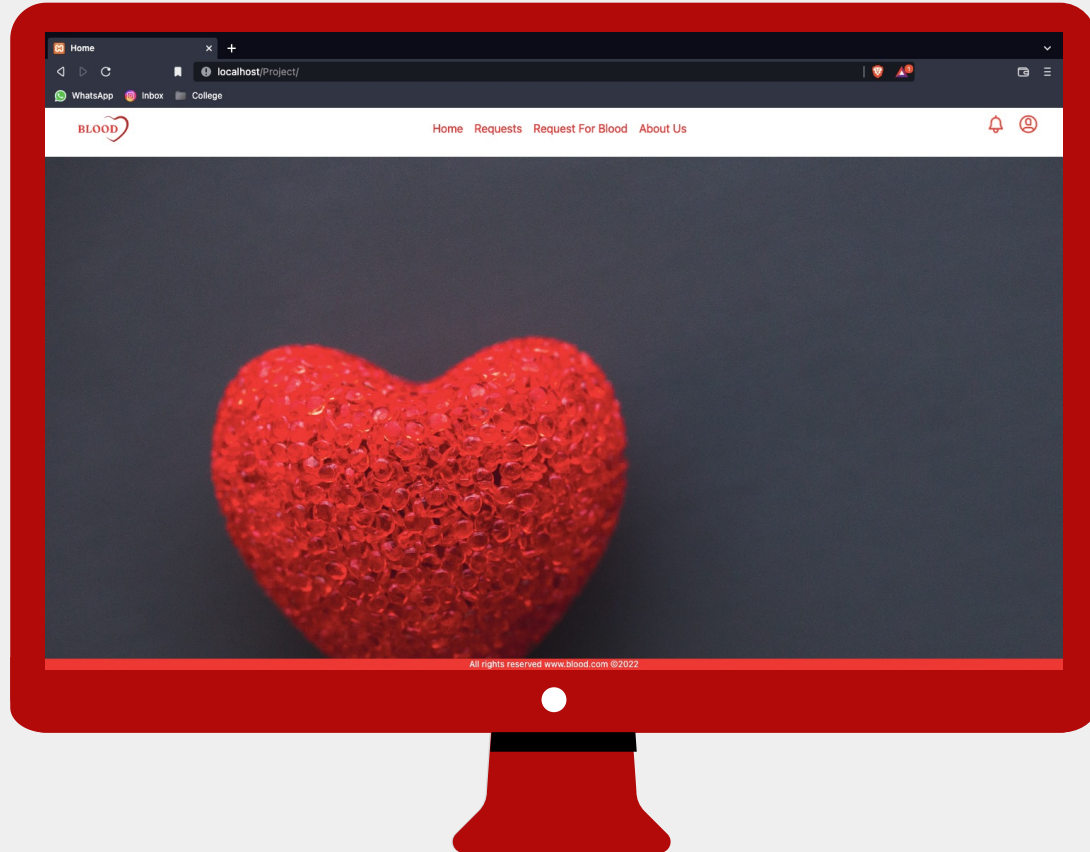

1. Login/ Register: - If you are preregistered then you have to login with your email and confidential password. Any new user can register over the website within minutes.
2. Posting of emergency: - On our special portal dedicated for posting of emergency, he will post about the name, blood group and location of the emergency.

Working of Project

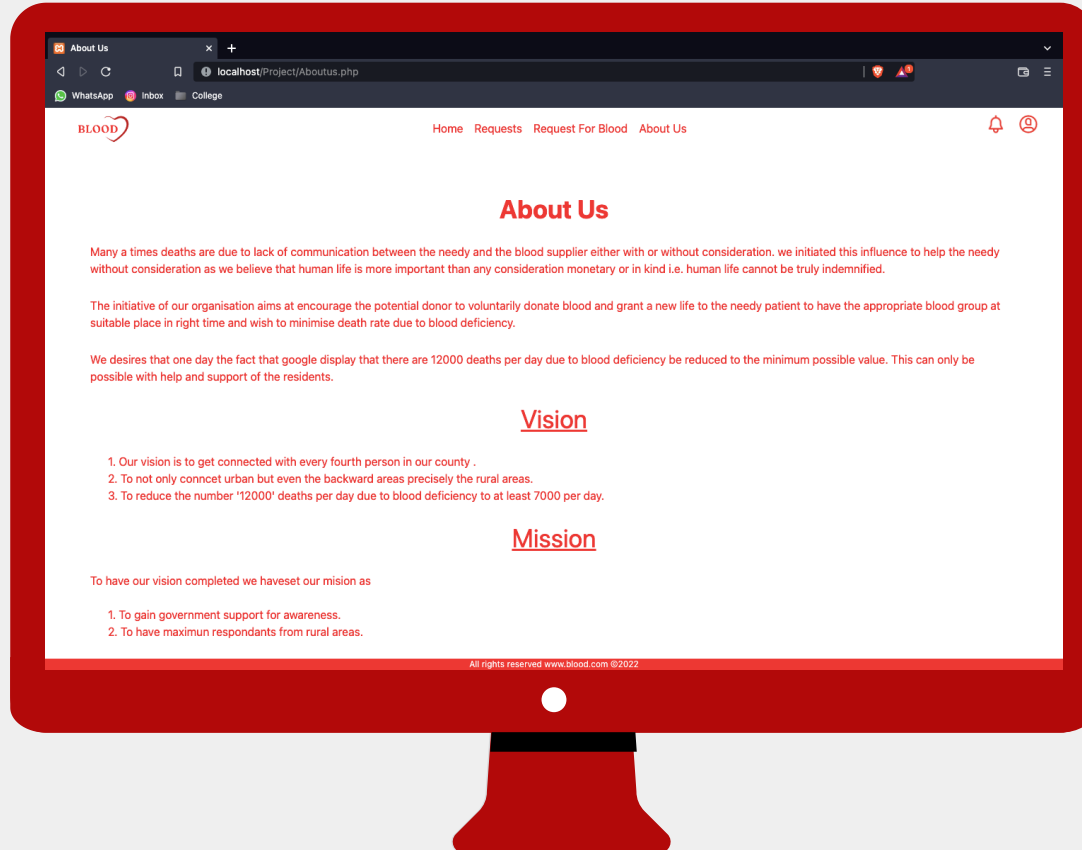

Our Website is made to tackle this type of situations.

1. Login/ Register: - If you are preregistered then you have to login with your email and confidential password. Any new user can register over the website within minutes.
2. Posting of emergency: - On our special portal dedicated for posting of emergency, he will post about the name, blood group and location of the emergency.
3. Finding compatible donor: - As soon as the emergencies are posted our server will find compatible donor i.e. donor with same blood group or universal donor within reasonable local limits so that he can reach on time.
4. Pre – Approval: Requesting potential donor: - After finding the compatible donor our servers will send notification to the compatible donor to become potential donor.
5. Post – Approval: Imparting location details: - After the potential donor decides to become the donor by accepting our request to donate the blood. After the approval the potential donor will be imparted with the location details of the needy.
